

Good afternoon all,

Wolf Creek Contracting deployed to Nitro today and began demolition efforts for the new Bank Street Streetscape Improvements! See attached photos taken at approximately 1:00 PM today. They have started at the corner of Bank and 21st Streets on the Rite Aid side, moving south toward Screen Graphics. They are making great progress, already completing most of the concrete and asphalt sawcutting necessary on that block, have demolished the sidewalks a good distance down the block, and have the phone company on-site coordinating overhead utility and utility poles removal. I encourage you to stop by and welcome Howard Offenberger (Wolf Creek Project Manager) and Buck Stanley (Wolf Creek Superintendent) to the great City of Nitro, I am sure they'd be glad to receive a warm and highly anticipated reception. The wait is finally over - big changes to improving the landscape of Nitro have begun!
